

FALCON GEODETIC LTD.

OUR PROMISE

Falcon takes pride in providing quality work and superior service to our customers. Our complete services and competitive prices provide our customers with both quality work and a positive professional experience. Whether your requirement is precision claimstaking or centimeter level survey, our state-of-the-art Trimble GPS equipment, experienced staff, and unique GIS approach provide our customers the precision results they demand and the accurate geodetic reference they need for their GIS software.

FALCON SERVICES

Non-Licensed Survey

- *Claimstaking*
 - *Drill Hole Survey*
 - *GPS Surveyed Soil Grids*
 - *General GPS Survey*

- \$1,000,000 liability insurance; proof of insurance supplied upon request
- Satisfied customers - references supplied upon request

FALCON TECHNOLOGY

Trimble Pro XRS

Falcon uses Trimble Pro XRS receivers with OmniSTAR high rate L-Band real time correction for reliable sub-meter "on-the-fly" accuracy. This arrangement simultaneously provides our customers sub-meter internal grid precision with sub-meter geodetic reference for each grid point. We have removed the guesswork from your GIS database. In other words, your grid is tied to real earth coordinates.

For typical "open sky" projects in Nevada our tests show that we achieve +/- 1 foot precision of position of 95% confidence with this equipment.

For centimeter level survey such as for drill holes or local grid control points we use carrier phase correction from a Trimble Pro XRS base station set up on a local control point. This arrangement allows us to provide our customers centimeter level internal precision between survey points and sub-meter geodetic accuracy for your GIS database.

FALCON PRICES

- Competitive Prices (*let us know what you think a good bid is*)
- Pricing Depends on Terrain and Job Size
- Jobs Typically Include:
 - *Mileage*
 - *Expenses*
 - *Claim Maps*
 - *Claim Notice Preparation*

ABOUT FALCON

Falcon Geodetic, Ltd. was started in June of 2003. Since the age of fourteen Owner Zac Henderson had been working on claimstaking and GPS survey in Nevada and general survey work in parts of California.

Falcon as a company is relatively new to the Mining Industry, but brings over a decade of GPS claimstaking and survey experience to the mining industry. Our expertise is now ready to serve you as a customer.
